SEAT recommends Castrol

Note

- We recommend that you visit an Authorised SEAT Service Centre whenever you require any work done on your vehicle.
- SEAT regularly communicates to its Authorised Service Centres new product developments. They have tools and highly specialized personnel who can guarantee the safety and performance of your vehicle.
- Scrupulously following the General Programme for Inspection Services in Authorised SEAT Service Centres will ensure you maintain greater value for your vehicle.

Service type

LongLife service or service dependent on time/distance travelled?

Depending on your vehicle's technical characteristics either the LongLife service or the service dependent on time/distance travelled will apply. If you do not wish to have the LongLife service you can choose the service dependent on time/distance travelled. Your Official SEAT Service has the most recent information about the services and can advise you on the best type

of service for your vehicle, and if there are any additional inspections it requires by law. In the following pages we have compiled the most important information about the services offered. These services are valid at the time of printing and can be subject to further modifications for technical reasons.

How to know which type of service your vehicle requires	
LongLife Service:	Service dependent on time/distance travelled:
- Your vehicle has LongLife Service if the PR number "QG1" (see back) appears on the vehicle data sticker and if, on ⇒ page 4, the LongLife Service is marked with a cross.	- Your vehicle has service dependent on time/distance travelled if the PR number "QG0, QG2 or QG3" (see back) appears on the vehicle data sticker and if, on ⇒ page 4, the Oil Change Service is marked with a cross.
- The Interval Service appears on the "Next Services" sticker (on the door pillar).	- The Oil Change Service appears on the "Next Services" sticker (on the door pillar).
- The LongLife Service is marked with a cross on ⇒ page 4.	- The service dependent on time/distance travelled is marked with a cross on ⇒ page 4.

SEAT differentiates between services *with* an engine oil change (e.g. Interval Service) and services *without* an engine oil change (e.g. Inspection Service). The service interval display only provides information about service dates that include a change of engine oil. The dates of all other services, such as Inspection Service or brake fluid change, appear in the sticker on the door pillar.

Note

If LongLife oil is not used, the service dependent on time/distance travelled is applied, and the oil must be changed every 15 000 km (10 000 miles) or every year. ■

Importance of the Maintenance Programme

The Maintenance Programme confirms the date of delivery of your vehicle and thus the beginning of its warranty cover.

The vehicle data that appears in the Maintenance Programme guarantees that the appropriate Genuine SEAT® Parts are installed. This data helps ensure that your car can be repaired without difficulty even after many years of use.

The Maintenance Programme also informs you of which service should be carried out when, and the work this entails.

Your Official SEAT Service will note down in this booklet the services carried out.

Your Maintenance Programme should be kept in the vehicle with the on-board documentation so that it is at hand whenever you need it.

Please remember to give the Maintenance Programme to the new owner if you sell your car.

The SEAT Service Centre network is equipped with modern workshop technology and well-trained specialists. Many SEAT Service Centres offer different service packages at special prices ■

Safety notes

All fluids and consumables, such as timing belts, tyres, coolant liquid, engine oil, spark plugs and vehicle batteries are continuously being developed. Therefore, we recommend you take the vehicle to a qualified workshop to have fluids or consumables changed. The Official SEAT Services receive regular up-to-date information about modifications. This is why SEAT recommends you have fluids and other consumables replaced by an Official SEAT Service.

Unless the vehicle is regularly and correctly serviced as required in the service plan, the vehicle could breakdown while driving, leading to serious accident and injury.

- Services should be carried out by a qualified workshop in accordance with the Maintenance Programme.
- Please observe the instructions for use.

Note

- Only use suitable fluids. Fluids should never be mixed up. This could result in serious faults and engine damage.
- SEAT is not responsible for damage to the vehicle as a result of the use of poor quality fuel, inadequate servicing or non-availability of original spare parts.
- Spilt brake fluid may pollute the environment. If fluids leak or are spilt, they should be collected and disposed of accordingly.
- Regular servicing of your vehicle not only helps to ensure it remains in good working order but also contributes to road safety. Therefore, we recommend work is carried out in accordance with the Maintenance Programme. ■

SEAT maintenance programme

Service intervals

General information

To ensure that you have each service carried out on time and that none are forgotten, there is a reminder sticker on the driver side door pillar and a reminder will also be shown via the service interval display on the instrument panel.

The service intervals quoted are for vehicles used under **normal operating conditions**.

However, if the vehicle is used in **adverse conditions**, it may require work before the next established service interval or even between service intervals.

Adverse conditions include:

- the use of fuel with a high sulphur content
- frequent short journeys
- leaving the engine idling for long periods of time (as occurs with taxis)
- driving on dusty roads or in dusty areas
- frequently using the vehicle for towing
- mainly driving in the city, in heavy traffic where it is necessary to continuously brake and start, and
- using the vehicle mainly in the winter

This particularly affects:

- the air filter
- the timing belt
- the engine oil and
- the diesel particulate filter

In some countries diesel fuel has a high sulphur content; in these cases **the fuel filter and the oil should be changed every 7500 km (5000 miles)** ⇒ page 7. Your Official SEAT Service will be able to tell you which countries have diesel with a high sulphur content.

The service advisor at your Official SEAT Service will advise you on the need to carry out additional work on your vehicle, taking into account the usage conditions of the vehicle.

A list of the work to be carried out at the SEAT services is given on the following pages. These services are valid at the time of printing and can be subject to further modifications for technical reasons. **Your Official SEAT Service always has the latest available information** and will be able to tell you if your vehicle requires any other additional inspections established by law.

The cost of the SEAT service may vary, depending on the vehicle type, equipment fitted, additional work and statutory inspections. Your Official SEAT Service will tell you how much the SEAT service will cost (labour and parts). ■

Intervals

Service	Service type	
	LongLife Service (PR no. QG1)	Service dependent on time/ distance travelled (PR PR: QG0, QG2 or QG3)
Oil change service ^{a)}	See ⇒ page 7, LongLife Service	According to the service interval display (every year or every 15 000 km/10 000 miles) ^{b)c)}
Interval service ^{a)}	According to flexible service interval display (maximum after 2 years) ^{b)}	Every 2 years or every 30 000 km (20 000 miles) ^{b)c)}
Inspection service ^{a)}	First service after 3 years or at 60 000 km (40 000 miles) ^{c)} , and then every 2 years /60 000 km (40 000 miles)	
Changing the brake fluid	First change after 3 years, then every 2 years (we recommend using only genuine SEAT brake fluid)	

^{a)} Under certain circumstances different services can be carried out at the same time (Oil Change and Interval Services in combination with the Inspection Service).

^{b)} If diesel with a high sulphur content is used, **the fuel filter and the oil should be changed every 7500 km (5000 miles)**. Your Official SEAT Service will be able to tell you which countries have diesel with a high sulphur content.

^{c)} Whichever comes first.

Please see the oil specifications given in the Instruction Manual.

In ⇒ page 8, General Service Programme you will find the work corresponding to each service.

LongLife Service

Thanks to the technology used at SEAT, with the **LongLife Service**, an Interval Service only has to be carried out when it is necessary.

The length of the service intervals is also determined by factors such as conditions under which the vehicle is used and personal driving style.

If LongLife engine oil is not used, the service dependent on time/distance travelled then applies. In this case, an oil change service will have to be carried out every 15 000 km (10 000 miles) or every year. This also applies if you reprogram the vehicle to the service dependent on time/distance travelled

Note

In addition to the Inspection and Interval Services, additional work should be carried out according to the time/distance travelled ⇒ page 10. ■

General Service Programme

Oil change service

Operations to be carried out on your vehicle

- Check the thickness of brake pads and the condition of front and rear brake discs.
- Change the engine oil and replace the oil filter.¹⁾
- The date of the next service is entered on the service sticker which is attached to the driver side door pillar
- The service interval display is reset

Interval service

Operations to be performed on your vehicle:

- Check the battery.
- Check the depth of the tyre tread (incl. the spare wheel), that tread wear is even, check the age and pressure of the tyres. Where applicable, adjust the tyre pressure monitor.
- Brake system inspected for leaks and damage.
- Check the brake fluid level and wear of pads.

- Check the thickness of brake pads and the condition of front and rear brake discs.
- Check the correct operation of the front and rear lighting, the turn signals, the hazard warning lights, the daytime driving lights, the static cornering lights and the automatic dipped beam control (where applicable) and the horn.
- Check if the windscreen is damaged.
- Check the coolant and anti-freeze liquid and top up as required.
- Inspect the engine and components of the engine compartment (from above) for leaks and damage.
- Inspect the engine and components of the engine compartment, the gearbox, the transmission, the final drive (especially flanges) and the track rod boots (from below) for leaks and damage.
- Change the engine oil and replace the oil filter¹⁾.
- Power steering hydraulic system: Check the seal and the fluid level, and if it is part of the equipment, if required, top up with hydraulic oil (only Exeo and Exeo ST)
- Check the expiry date of the puncture kit tyre sealant (where applicable) and record; check whether the bottle is damaged and the level of the sealant.
- Check the windscreen wipers and headlight washers (where applicable) operate correctly; check the blades, the rest position, the final position and possible damage, and top up the washer fluid as required. ►

¹⁾ If diesel with a high sulphur content is used, the fuel filter and the oil should be changed every 7500 km (5000 miles). Your Technical Service will be able to tell you which countries have diesel with a high sulphur content.

- The headlight adjustment is checked
- The date of the next service is entered on the service sticker which is attached to the driver side door pillar
- The service interval display is reset

Inspection service

Operations to be performed on your vehicle:

- The exhaust system is checked for leaks, damage and secure fitting
- ATF in the automatic gearbox: Check and, where necessary, top up with fluid (except Exeo, Exeo ST and 09G gearbox in hot climates).
- Power steering hydraulic system: Check the seal and the fluid level, and if it is part of the equipment, if required, top up with hydraulic oil (only Exeo and Exeo ST).
- Check the battery.
- Check the depth of the tyre tread (incl. the spare wheel, if applicable), the evenness of the tread wear, the age and pressure of the tyres. Where applicable, adjust the tyre pressure monitor.
- Check brake system and dampers for leaks and damage.
- Check the sunroof (where applicable) operates correctly and if necessary clean and lubricate guides.
- Check the thickness of brake pads and the condition of front and rear brake discs.
- Check the correct operation of the front and rear lighting, the turn signals, the hazard warning lights, the daytime driving lights, the static cornering lights and the automatic dipped beam control (where applicable) and the horn.
- Check if the windscreen is damaged.
- Check that the interior and glove box lighting, the cigarette lighter/power socket, horn and warning lamps work correctly.
- Body: check for visible rust.
- Check the condition and, if required, the tension of the Poly V-belt.
- Check the coolant and anti-freeze liquid and top up as required.
- Inspect the engine and components of the engine compartment (from above) for leaks and damage.
- Visually inspect (from below) the engine and components of the engine compartment, the gearbox, the end drive and the track rod boots for leaks and damage.
- Check the engine oil level.
- Check the expiry date of the puncture kit tyre sealant (where applicable) and record; check whether the bottle is damaged and the level of the sealant.
- Take a test drive and check that the brakes, handbrake, steering, and air conditioning operate correctly, and perform a kickdown.
- Check the windscreen wipers and headlight washers (where applicable) operate correctly; check the blades, the rest position, the final position and for possible damage, and top up the washer fluid as required.
- The headlight adjustment is checked
- Coil spring (suspension) and bump stop, front and rear: visual check for damage

- The date of the next service is entered on the service sticker which is attached to the driver side door pillar
- Check the play, fastening and boots of the track rods and the front and rear axle bearings.
- Lubricate door arresters
- Inspected the underside protection for damage.

Note

- It may be more convenient, taking the individual usage conditions of your vehicle into account, to have certain scopes of the interval service inspection done earlier or at a later, separate date. The service advisor at your Official SEAT Service will advise you accordingly.
- The engine type determines toothed belt replacement intervals. For more information on the replacement of the toothed belt, check the chapter on additional tasks. The service advisor at your Official SEAT Service will advise you accordingly.

Additional tasks

In addition to the Inspection Service, additional maintenance jobs may have to be carried out, depending on the conditions in which your vehicle is used and on the equipment carried. This additional work should be carried out in accordance with time/distance travelled to ensure your vehicle remains reliable. Your Technical Service will provide detailed information about the additional work that may be necessary. This can be done independently of the obligatory services, taking into account the notes on the Maintenance Programme (or the label: Next service). Your SEAT Service Centre will be happy

to advise you and quote the prices for this additional work. Additional jobs completed are marked on the workshop sheet with the receipt. ■

Every 7500 km (5000 miles)

- Replace the fuel filter in TDI® diesel engines that use diesel with a sulphur content of more than 2000 ppm. (Except Exeo and Exeo ST). ■

Every 15 000 km (10 000 miles)

- Replace the rubber bearings of the engine cover (only engines with engine codes CDLA and CDLD). ■

Every 30 000 km (20 000 miles)

- Fuel filter: Replace (diesel engine vehicles if the fuel does **not** comply with the EN 590 standard, except Exeo and Exeo ST).
- LPG installation filter: Replace (only engines with LPG)¹⁾.
- Dust and pollen filter for the passenger compartment: Replace (only Ibiza, Ibiza SC, Ibiza ST, Exeo and Exeo ST).
- Gas hoses: inspect for damage (only engines with LPG)¹⁾.
- LPG filler neck and cap¹⁾: Check condition and, if necessary, clean and inspect seals (only engines with LPG)¹⁾. ■

¹⁾ LPG: Liquefied petroleum gas.

Every 60 000 km (40 000 miles)

- Change oil and oil filter for DSG[®] automatic gearboxes (only 6-speed DSG[®] gearboxes).
- Change the automatic gearbox oil (only Exeo, Exeo ST and 09G gearbox in hot climates).
- Dust and pollen filter for the passenger compartment: Replace (only Altea, Altea XL, Altea Freetrack, Leon and Alhambra).
- Spark plugs: Replace (except 1.8 and 2.0 TFSI engines up to 147 kW).
- Air filter: Clean casing and replace filter element (only engines codes CDLA and CDLD and Diesel engines in Exeo and Exeo ST).
- Fuel filter: Replace (only Exeo and Exeo ST, engine codes CAGA, CAGC, CAHA).
- LPG evaporator: Check for traces of oil or other dirt (only engines with LPG)¹⁾. ■

Every 90 000 km (60 000 miles)

- Air filter: Clean casing and replace filter element (except engines codes CDLA and CDLD and Diesel engines in Exeo and Exeo ST).
- Fuel filter: Replace (only Diesel engines which use fuel that complies with the EN 590 standard. In Exeo and Exeo ST, except engine codes CAGA, CAGC, CAHA).
- Spark plugs: Replace (only 1.8 and 2.0 TFSI engines up to 147 kW).

¹⁾ LPG: Liquefied petroleum gas.

- LPG evaporator paper filter: Replace (only engines with LPG)¹⁾. ■

At 90 000 km (60 000 miles) the first time, then every 30 000 km (20 000 miles)

- Timing belt for camshaft: Check condition and replace if necessary (only petrol engines, except 2.0 TFSI). ■

Every 180 000 km (120 000 miles)

- Timing belt for camshaft: Replace (only 2.0 TFSI engines in Exeo and Exeo ST). ■

At 180 000 km (120 000 miles) the first time, then every 30 000 km (20 000 miles)

- Particulate filter: Check (TDI Common Rail engines). ■

Every 210 000 km (130 000 miles)

- Timing belt for camshaft: Replace (TDI Common Rail engines). ▶

- Camshaft timing belt tension roller: Replace (TDI Common Rail engines). ■

Every 2 years

- Dust and pollen filter for the passenger compartment: Replace.
- LPG installation filter: Replace (only engines with LPG)¹⁾. ■

Every 3 years

- Haldex clutch: Change oil (four-wheel drive vehicles only). ■

After 3 years the first time, then every 2 years

- Brake and clutch fluid: Replace.
- Check the gas system (LPG) (only LPG engines)¹⁾. ■

Every 4 years

- Spark plugs: Replace (except 1.8 and 2.0 TFSI engines up to 147 kW).

- Air filter: Clean casing and replace filter element (only engines codes CDLA and CDLD and Diesel engines in Exeo and Exeo ST).

- Replace AdBlue (Blue TDI engines with less than 15 000 km / 10 000 miles in 4 years). ■

Every 6 years

- Spark plugs: Replace (only 1.8 and 2.0 TFSI engines up to 147 kW).
- Air filter: Clean casing and replace filter element (except engines codes CDLA and CDLD and Diesel engines in Exeo and Exeo ST).

Note

- We recommend that you visit a SEAT Authorised Service whenever you require any work done on your vehicle.
- SEAT keeps its Authorised Services up-to-date on new product developments. They have tools and highly specialised personnel who can guarantee the safety and performance of your vehicle.
- Scrupulously following the General Programme for Inspection Services at the SEAT Authorised Services will ensure you maintain greater value for your vehicle. ■

¹⁾ LPG: Liquefied petroleum gas.

Other services available

Legal Inspection Service

The legal inspections must be carried out at the intervals prescribed.

Many countries have legal requirements obliging owners to have their vehicle tested at specified intervals for safety for the user and for other traffic, as well as ensuring that vehicle exhaust emissions meet the countries' regulations. These revisions must be overseen by officially certified centres.

Your Technical Service can advise of the inspections required by law, and can check your vehicle in the course of an Inspection Service. This will save you both time and money.

The Technical Service can also carry out the inspections required by law at the client's request.

Even if you do not wish to take advantage of this service and decide to take your car to an officially certified centre for this check, we recommend that you speak to the manager of your Technical Service first.

This person will be able to inform you of any points that require attention so that your car does not fail the test and have to be re-tested. ■

Approved spare parts

All parts of your vehicle have been approved by SEAT, especially those parts on which your safety depends. For this reason, the parts used in the Pro-

grammed Inspection Services or in any vehicle repair must correspond exactly to the manufacturer-defined requirements. The approved SEAT spare parts have been designed especially for your vehicle. For this reason, we recommend that Genuine approved SEAT spares are always used.

In the Authorised SEAT Service Centres you will find the most important approved spare parts. If in an exceptional case, the necessary parts are not in stock, they can, in general, be obtained swiftly.

The SEAT Service Centres in the EU provide a 24 month warranty¹⁾ for Approved Spare parts from the date they are fitted or sold. It is therefore advisable to retain the original invoice from the Technical Service as proof of the existing warranty.

More information about this may be obtained from your Technical Service. ■

Approved SEAT exchange parts

The approved SEAT exchange parts, conforming to the manufacturer's requirements, constitute an additional service at your disposal, offering you the possibility to replace entire assemblies, the most common being: the lightened engine, gearboxes, cylinder heads, control units, electrical elements, etc.

These are **Approved parts** and as such, share the same approved spare parts warranty as the manufacturer parts. ►

¹⁾ The warranty is not available for all export markets. For more information, please ask your Authorised SEAT Technical Service.

However, these parts are considerably cheaper as they are factory-reconditioned used parts. Keep the invoice for the approved SEAT exchange parts as proof of the start of the existing warranty.

More information about this may be obtained at the Technical Service. ■

Genuine accessories

We recommend that you use only Genuine SEAT Accessories and accessories approved by SEAT.

If you wish to equip your car with accessories, you should remember the following points:

We recommend that you use only genuine SEAT and SEAT approved accessories.

SEAT provides a warranty for Genuine Accessories valid from the date of purchase or fitting. It is therefore advisable to retain the original invoice from the Technical Service as proof of the existing warranty.

More information about this may be obtained from your Technical Service.

The accessories service also offers you expert advice and, if required, fitting by a specialist.

In addition, Technical Services can supply car care products and parts subject to normal wear, such as tyres, batteries and light bulbs. ■

Paintwork and body service

SEAT vehicles are designed in such a way that, in case of bodywork damage, there is only need to replace and paint the parts that have been really affected.

Both operations must be carried out according to the requirements of the manufacturer; this is an essential condition for conservation of the bodywork and paintwork warranties. ■

Warranty

Fault-free operation warranty

According to the clauses of the warranty applied to SEAT vehicles in the sales contract, **A fault-free operation warranty of 2 years in accordance with legal requirements¹⁾²⁾** is provided from the date of delivery.

We hope that it is understood that **natural wear** as well as damage caused by the abuse of vehicle performance through inappropriate use or by unacceptable modifications are excluded from the warranty. The warranty is also invalid when the vehicle is damaged by the use of parts and accessories that are not SEAT approved or damage due to ignoring the maintenance and repair requirements. ■

Paintwork and body warranty

Technical Services provide a warranty on bodywork and paintwork for vehicles sold in the EU.

In addition to the warranty conditions for brand new SEAT vehicles (as detailed in the purchase contract), a defined period warranty is also provided covering paintwork and bodywork rusting:

- The additional warranty on paint faults covers the first 3 years following delivery
- Covered against perforation rusting on the body during the first 12 years following delivery.

If, however, this type of damage should occur, it will be repaired free of charge including parts and labour by any SEAT Technical Service in Europe.

Warranty claims will not be accepted in the following circumstances:

- if damage is caused by external influence or carelessness, or
- if damage to the body is not repaired promptly and appropriately in accordance with the manufacturer's instructions using genuine, approved spare parts and materials, or
- if perforation rusting is caused by the use of non-genuine parts and materials for body repairs and if these repairs were not carried out in accordance with the manufacturer's instructions.

If the bodywork is repaired or painted, your Technical Service will certify your warranty against through-rusting for the repaired sections. ■

Approved SEAT exchange parts

The approved SEAT exchange parts, conforming to the manufacturer's requirements, constitute an additional service at your disposal, offering you ►

¹⁾ The warranty is not available for all export markets. For more information, please ask your Authorised SEAT Technical Service.

²⁾ As well as the legally required warranty, SEAT offers an extended warranty to their clients in some European countries. The specific conditions of this extended warranty are detailed in the vehicle sales contract.

the possibility to replace entire assemblies, the most common being: the lightened engine, gearboxes, cylinder heads, control units, electrical elements, etc.

These are **Approved parts** and as such, share the same approved spare parts warranty as the manufacturer parts.

However, these parts are considerably cheaper as they are factory-reconditioned used parts. Keep the invoice for the approved SEAT exchange parts as proof of the start of the existing warranty.

More information about this may be obtained at the Technical Service. ■

Genuine accessories

We recommend that you use only Genuine SEAT Accessories and accessories approved by SEAT.

If you wish to equip your car with accessories, you should remember the following points:

We recommend that you use only genuine SEAT and SEAT approved accessories.

SEAT provides a warranty for Genuine Accessories valid from the date of purchase or fitting. It is therefore advisable to retain the original invoice from the Technical Service as proof of the existing warranty.

More information about this may be obtained from your Technical Service.

The accessories service also offers you expert advice and, if required, fitting by a specialist.

In addition, Technical Services can supply car care products and parts subject to normal wear, such as tyres, batteries and light bulbs. ■

Paintwork and body service

SEAT vehicles are designed in such a way that, in case of bodywork damage, there is only need to replace and paint the parts that have been really affected.

Both operations must be carried out according to the requirements of the manufacturer; this is an essential condition for conservation of the bodywork and paintwork warranties. ■
